

SPEND TIME MODERNIZING YOUR BUSINESS, NOT MANUALLY MANAGING IT REQUESTS

Are outdated, manual IT processes giving you a headache? Constant IT and help-desk issues, low process visibility, redundant forms and requests, manual errors, frustrated workers, time-consuming coding to accommodate siloed systems and outdated infrastructure ...

Are these endless tasks keeping you from other critical work that would help to transform your business?

What if you could automate your processes, make work easier for your employees and reduce your workload – without an IT-infrastructure overhaul?

*“We can use K2 not just for one solution, but to **build new solutions as needs arise**. Potentially, we could reuse the K2 software in **all areas of the business** for all kinds of needs.”¹*

– John Reading, manager of IT business systems, Webroot

K2 HELPS YOU AUTOMATE AND SIMPLIFY IT WORKFLOWS TO ELIMINATE BUSY WORK

- + Create an automated support-ticket system for help-desk requests
- + Offer self-help portals that enable employees to solve issues on their own
- + Simplify and automate employees' password resets
- + Provide service-request management apps for multiple devices and platforms
- + Automate workflows for handling device and access requests for new employees

WHAT ELSE CAN K2 DO FOR YOU?

With K2 you can create applications, workflows and forms that can help you streamline all your IT processes while strengthening security, visibility and compliance.

- + Create apps and workflows that integrate with Microsoft SharePoint and other line-of-business (LOB) systems
- + Automate help-desk and IT service management and support
- + Quickly create custom, responsive business apps for all devices and users, with little or no code

ARE YOU READY TO TRANSFORM YOUR WORK?

Reduce IT workloads with business apps that reach across your existing systems – on premises and in the cloud. Streamline simple and complex processes while keeping your data secure and in compliance with your policies.

Talk to your IT manager about K2 or visit our website to [learn more](#) about what K2 can do for your company.

Sembcorp's IT department used K2 to transform the company's entire workflow development and management system to service 8,000 employees in 16 countries.²

The result:

- + 96 percent reduction in the time required to create workflow and e-forms
- + Faster approval times, with remote approval enabled
- + \$33,800 annual savings in operational expenses
